XTREME SUMMER DAY CAMP 09

During July, Crafton Hills College participated in a joint program with Colton Redlands Yucaipa ROP to provide a week of Xtreme Summer Day Camp for three groups of about 20 students each. The Camp's targeted 7th and 8th grade students with a focus on Science fields and encouraging them to plan for college attendance. Thursdays were "Crafton Days". In the morning they participated in some field geology work in Mentone wash under the instruction of Professor Rich Hughes. They took rock samples and did some basic statistical analysis of the unique types of rocks found here. They also stood directly on the San Andreas fault and learned what really happens during "The Big One". After having lunch at the Crafton Hills Cafeteria and a short campus tour they participated in three biology

labs lead by Anil Kapoor to determine the spread and tracing of a mock virus, a CSI investigation and some genetic investigations. This program was funded by the SB70 – San Bernardino Valley Consortium Grant. The camp was a great success and CHC hopes to collaborate again next year if funding is available.
