BIOL-C1000: Introduction to Biology with Lab

This combined lecture and laboratory course provides the non-biology major with an introduction to living things and their environment. Students use experimentation and investigation to develop important critical thinking skills. Students learn about the process of science, the building blocks of life, the role and regulation of DNA, how populations change over time, the movement of energy within and between life forms, and how species interact with each other and their surroundings. By the end of the course, students will be able to apply an understanding of biological concepts to current issues and their impacts on society. (Formerly BIOL 100)

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

CNA/N-651: Phlebotomy Technician I Clinical

This program is designed to fulfill the clinical training requirements to become a Certified Phlebotomy Technician I (CPTI) for the State of California. Upon meeting the admission requirements, satisfactorily completing the didactic and externship portions of the program, and receiving a passing grade on an approved national certifying exam plus certification from such agency, the student will be able to apply for a CPTI license from the Laboratory Field Services, California Department of Health Services. The class is taught through lectures, class exercises (basic and advanced), and clinical experiences at local externship sites (practical). Students will be trained to perform a variety of blood collection methods using the proper techniques. These methods include the evacuated tube system, syringe collection, winged infusion collection, and capillary puncture on adults, children, and infants.

Chemistry

CHEM-101: Introduction to Chemistry

Introduction to college chemistry, with an emphasis on the general principles of chemistry, including critical thinking, analysis and problem solving in chemistry. Topics include the study of matter, bonding, the periodic table, stoichiometry, chemical reactions, nomenclature and organic chemistry. Laboratory component is both qualitative and quantitative in scope. Critical thinking, writing, measurement, identification and analysis are emphasized.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

CIS-135: Certified Ethical Hacker

In order for students to compete for gainful employment in the cyber security field, both hands on experiences and certifications are necessary. For students who want to be cyber security professionals, this is the course to take as the course will expand their skills and knowledge. This course builds upon the topics and skills learned in CIS134 and will prepare students for the Ethical Hacker Certification Exam. In addition, this course will focus on defensive hacking, with a code of ethics to guide students as professionals on how to use their skills for the greater good. Sample topics covered in this course are system fundamentals, enumeration, system hacking, Penetration Testing, system hardening, cloud technology security and social engineering. While CIS134 is not required, it is highly encouraged as CIS134 is more hands on and this course focuses on the Ethical Hacker (EH) certification exam.

Note: Once registered for the class, students will need to complete the online class that will take approximately 3 hours. Since this is a blended learning course, a student completes part of the course in a self-directed manner online, followed by a hands-on skills session in person with an ARC Instructor. ARC eLearning courses are fully self-directed, and do not require a separate hands-on skills session. The materials needed to be completed will be e-mailed to them to their Crafton's email address from the American Red Cross. Once students have completed this portion, the instructor will be notified. This must be done before the beginning of the class.

MATH-915: Ideas of Mathematics Support

A review of the core prerequisite skills, competencies, and concepts needed in Ideas of Mathematics. Topics include: a review of computational skills developed in non-transferable math courses including but not limited to, operations on rational numbers and algebraic expressions, understanding and applications of percentages, graphing linear and quadratic functions, functions including composition and inverses. Pass/No Pass only. Non-degree applicable.

Credit Type: Earned units for this course are NOT applicable to an Associate Degree.

Grading Restriction: Graded on a Credit/No Credit basis only.

Prerequisite: MATH 095 or eligibility for MATH 115 as determined through the Crafton Hills College assessment process.

Psychology

PSYC-102: Personal and Social Adjustment

Examination of human capacity to change, adapt, and cope with a variety of circumstances over the life span. Special attention is paid to the sociocultural contexts of adjustment, the role of self understanding in adjustment, stress, adult development, careers, and family issues. A variety of theoretical perspectives will be used to review healthy and unhealthy behavior patterns as well as coping techniques for day-to-day concerns.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite(s): PSYC C1000 or PSYC C1000H (formerly PSYCH 100 and PSYCH 100H).

PSYC-120: Statistics for the Social and Behavioral Sciences

The use of probability techniques, hypothesis testing, and predictive techniques to facilitate decision making. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance; chi squared and t-tests; effect size; confidence intervals; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings, especially for practical applications using data from disciplines such as the social sciences, health care and education. While the STAT C1000 class approaches these topics with a firmer grounding in the principles of mathematics, this PSYC 120 does cover the mathematical basis of statistics, probability theory and estimation, but focuses on the interpretation and application, uses and misuses, and the analysis and criticism of statistical arguments in public discourse.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.
