ACE-IT Competency Based Education Course and Program Development Symposium

South Texas College invites you to attend this free one-day, interactive virtual symposium that will give you the knowledge and skills needed to develop quality Competency-Based Education (CBE) courses and programs. Our team has already helped numerous institutions of higher education throughout Texas and the United States to develop CBE courses and programs that are both in-person and 100% online; options that are invaluable in these times of uncertainty. Registration for this Symposium is free of charge, but space is limited to 500 attendees.

Don't miss this unique opportunity. Emphasis is on Information Technology programs, but the knowledge and skills that you acquire in this symposium can be equally applied to develop CBE courses and programs in any career and technical education field. Topics that will be covered include but are not limited to conceptualizing and writing competencies, best practices in developing CBE pre and post-assessments, selecting and/or developing CBE educational materials, estimating CBE program development and administration costs, and much, much more.

So, don't wait. Register now to join us in for this instructional symposium featuring hands-on, interactive workshops and benefit from presentations by internationally recognized experts in CBE that include Dr. Amardeep Kahlon and Ms. Ann Kennedy, Hosts of the Fast Track Conference on CBE; Mr. Carlos Rivers, Executive Director of the Institute for Competency-Based Education; and Dr. Kevin Peek, author of Competency-Based Education Made Easy. The registration link may be seen below.
