For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2021-2022 job placement rate will be the number of students who completed the program in 2020-2021.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2020-2021, you do not need to report a job placement rate for 2021-2022. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 19.

Our institution has programs that meet these conditions.

**20. Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).**

The College surpassed the number of certificates stretch goal. However, the college has not consistently maintained awarding this number of certificates and will continue to monitor the number of certificates and the stretch goal to determine if it needs to be adjusted.

The College's Bachelor's Program in Respiratory Care offered its first sections for the program in Spring 2024. Data for the number of degrees will not be available until for another two years.
