

Successful Course Completion

Crafton Hills College has an institution-set standard of 63.6% for the successfully course completion rate. The stretch goal is 73%. The institution-set standard and the stretch goal were set based on the fall successful course completion rate. This was the first year in which the ACCJC Annual Report requested the successful course completion rate as annual number, and not the fall number. Accordingly, the rate increase because summer was included, which tends to have a course completion rates. The Institutional Effectiveness, Outcomes, and Assessment Committee will be reviewing the institution-set standards and stretch goals to adjust for this change. When examining the fall course success rates the College has not been able to sustain the 73% target for more than one semester. In the five years the annual successful course completion rate has ranged from 72.5% to 73.8%.

Course success rates have remained relatively consistent and well above the institutional set standard across all ethnic groups, except with respect to African American students. The success rate observed among African American students has declined from a five-year peak of 70% in 2016-17 to 62% in 2018-2019. These findings have spurred college action, particularly with respect to the enhanced efforts towards identifying the potential reasons underlying this achievement gap.

Success rates have also remained consistent for male and female students, all of which achieved success rates well above the institutional set standard. In fact, the success rates across both gender groups remained similar across the five-year period between 2014-15 and 2018-19. The course success rates of students for whom no gender is recorded has varied from year-to-year, largely due to the small numbers of students per year (ranging from zero to eight).
