Description of assessment

Briefly describe how students who successfully complete the course demonstrate the overarching learning outcomes by means of the selected methods of assessment.

Analysis

1. Describe the processes that faculty in your department/discipline use, have used, or plan to use to analyze students' assessment results.
2. What successes, problems, if any, were evident as a result of the analysis?

Actions to be taken

1. What successes, problems, opportunities, or needed changes, if any, were evident as a result of the analysis?
2. What resources are needed to help students better achieve the outcomes? How would the requested resources enhance Student Learning Outcomes?
