

# EVAC+CHAIR®

STAIRWAY EVACUATION CHAIR

Have you seen these chairs? They are located in buildings throughout campus at Valley and Crafton. Ever wonder what they are for?

The ADA requires each building to have accessible means of egress (ADAAG 4.1.3(9), 4.3.10), but does not specify a solution. During most emergencies, the preferred method of egress — elevators — are out of service for safety reasons. The EVAC+CHAIR serves as an effective means of exiting a multistory building for handicapped or incapacitated individuals. Want to learn how to use these chairs in an emergency, no problem? Click on the link below and see a training video and interactive demo on how to use these chairs safely.
