## Preamble

### *Main Purposes of the Educational Master Plan*

The main purposes of the Educational Master Plan (EMP) are as follows:

- It provides an integrated framework within which the College can work in coordinated fashion toward long-term goals in support of student learning.
- It facilitates effectiveness and accountability in the pursuit of the mission of the College.
- It focuses College resources, including staff time and energy, efficiently on important long-range issues, consistent with the District's and the College's missions and overall strategic directions.
- It helps the College anticipate challenges and take advantage of opportunities.
- It guides further planning and decision-making at all levels, and remains a living, strategically useful document.

### *Background and Process*

Preparation of this Plan has its roots in Spring 2006, when President Gloria Harrison convened an Educational Master Plan Committee with shared-governance representation to develop the elements of an EMP. From Spring 2006 through Spring 2007, the Committee, with information from an environmental scan and broad input from campus forums, developed a mission statement, a vision statement, institutional values, and a set of five overarching goals for the EMP. The CHC EMP remained essentially in that state from Spring 2007 through early Spring 2009, when an ad hoc group began laying groundwork for further development in response to the recommendations of the Accrediting Commission for Community and Junior Colleges. In July 2009, a newly constituted shared-governance Educational Master Planning Committee (EMPC) began work in earnest on this Plan. This new group included several members who had served on the 2006-07 Educational Master Planning Committee, had participated in the ad hoc group in Spring 2009, and/or were currently serving on the Planning and Program Review Committee, the other principal committee heavily involved in integrated planning, evaluation, and improvement efforts. The new configuration was designed to ensure integration of institutional planning efforts from the unit level through the College level, and to facilitate communication about integrated planning processes and structures among all constituent groups.

In weekly two-hour meetings from July 2009 to publication of this Plan, the EMPC performed the following tasks:

- Reviewed the College Mission, Vision, and Values statements, and major planning and related documents. Each member was designated as a primary or secondary point person for one or more major planning documents (e.g., Basic Skills Initiative Plan, Professional Development Plan, Enrollment Management Plan).
- Revisited the 2007 EMP Goals.
- Reviewed the current cycle of planning and program review documentation for recurring issues and themes.
- Reviewed the strategically salient characteristics of the College, its students, and its service area.
- Informed constituency groups about the committee's progress.

- Solicited input and feedback on the Plan from the Academic Senate, the other constituency groups, and individuals throughout the College community (see below).
- Considered the draft District Strategic Plan.
- Developed a recommended set of institutional Quantitative Effectiveness Indicators (QEIs).
- Based on discussion and analysis of all the information collected, developed and refined a set of Strategic Directions, Goals, and Objectives.
- For each objective, identified a responsible point person or group, a tentative timeline, and a set of suggested actions.

The Committee received input and feedback from the Academic Senate, the other constituency groups, and the rest of the College community in four cycles:

- In September 2009, the recommended QEIs were presented by Committee members to the Academic Senate, the Classified Senate, the Student Senate, and the Management Team for questions and feedback.
- In November 2009, Committee members facilitated workshops in meetings of the four constituency groups. Participants reviewed the recommended Strategic Directions and Goals, and recorded ideas for concrete steps the College should take in pursuing the Goals.
- In March 2010, the President distributed the latest draft EMP (including Strategic Directions, Goals, Objectives, Timelines, Point Persons, and Suggested Actions) and the recommended QEIs with baselines and targets to all College employees and to student leadership with a request for feedback. In addition, Committee members made presentations to meetings of the four constituency groups. Members answered questions and encouraged the audience to send feedback to their constituency representatives or to the chair of the Committee. In addition, Committee members held two open forums—one evening and one morning—to give everyone an additional opportunity to ask questions and offer feedback.
- The President distributed the final recommended draft of the EMP to all College employees and to student leadership for one more round of feedback in April 2010. Committee members also made one more round of presentations to meetings of the four constituency groups.

The Committee seriously considered all feedback received in each cycle, and made changes as appropriate to strengthen the Plan. It then submitted the final version to the President on May 11, 2010.

### ***Evaluation and Revision of the Plan***

The Committee will evaluate the EMP annually beginning in Spring 2011. The evaluation will include at least the following elements:

- Review of progress reports by point persons or point groups on all Objectives
- Review of progress on QEIs and update of associated tables and graphs
- Assessment of overall progress on Strategic Goals and Strategic Directions

- Incorporation of updated information as needed, including environmental scan data, College characteristics, the budget outlook, program highlights, and any revisions of foundational statements
- Retirement of any Objectives and/or Goals that have been achieved
- Revisions of Objective language, timelines, suggested actions, or other aspects of the Plan, if needed to reflect changed circumstances or to facilitate further progress
- Addition of Strategic Directions, Goals, and/or Objectives in light of progress to date and institutional needs
- Incorporation of campus and constituency group feedback on recommended changes as appropriate

The Committee will submit its final recommendation for revisions of the EMP to the College President by June 30 each year. After final approval by the President, the EMP will be posted on the College website, and all members of the College community will be notified of its availability.

## **Crafton Hills College Foundational Statements**

The Crafton Hills College foundational statements—Mission, Vision, and Values—underlie the Strategic Directions and Goals in this Educational Master Plan.

### ***Mission***

The mission of Crafton Hills College is to advance the education and success of students in a quality learning environment.

### ***Vision***

The vision of Crafton Hills College is to be the premier community college for public safety and health services careers and transfer preparation.

### ***Values***

Our institutional values are creativity, inclusiveness, excellence, and learning centeredness.

### Program Highlights

Retention, Success, FTES, WSCH, FTEF, and the WSCH/FTEF Ratio for Fall 2009 at Crafton Hills College by discipline is illustrated in Table 9. The success rate ranges from 50.0% to 98.8%. The overall success rate in Fall 2009 was 69.3%. As was mentioned previously, the overall CHC institutional success rate target is 73.4%. The WSCH/FTEF ratio for each discipline in Fall 2009 ranged from 255 to 1,017. Most of the disciplines had a 500 WSCH/FTEF ratio or higher. Sociology, oceanography, religious studies, and anatomy all had WSCH/FTEF ratios that were higher than 900.

### ***Instructional Program Directions***

The Instructional Area at Crafton Hills College values best practices and innovative strategies aimed at enhancing student success. Specific strategies already implemented include learning communities, integration with support services, student learning outcomes assessment, improved classroom technology, and quick-start review modules. Experimenting with and improving such strategies will continue despite severe budget cuts.

The state budget crisis has wounded higher education in California, and the College has experienced unprecedented student demand due to both the economic downturn and deep cuts at CSUs and UCs. Instructional leaders at CHC, both faculty and management, continue to find ways to serve as many students as possible while maintaining instructional quality, and will continue to experiment with strategies for engaging students in large classes with limited resources. The outstanding dedication to student learning demonstrated by faculty and staff will continue to be a source of pride and strength through difficult times.

These external demands, combined with the intrinsic commitment to quality learning, have required the Instructional Area to focus on core programs and services. The following clusters are the focal points for the Instruction Area:

**Public Safety and Health Careers** – The College has an excellent reputation in the business community, with these programs training hundreds of qualified first responders and allied health professionals each year. The high-quality instruction in this area will continue. Faculty in these programs have excellent relationships with employers and strive to keep their curriculum current. New courses in Emergency and Disaster Management have been rolled out and Water Safety is being explored to take advantage of the new pool facility.

**Science** – Courses in the natural sciences are in high demand at the College. These disciplines are essential to transfer preparation and for entrance into health programs such as nursing and allied health. Efforts will continue to expand the number of sections and resources available to the sciences. New programs include GIS and Surveying, and grant funding to develop pre-engineering is being pursued.

**Developmental Education and Support Services** – The College’s Basic Skills Plan concentrates on creating a cohesive and integrated developmental education program. Pre-collegiate courses in math, English, reading, library science, and college life are designed to prepare students for success in higher-level courses and provide foundational skills necessary for lifelong success. Efforts to integrate learning resource services such as tutoring with classroom experiences will continue.

**Transfer Math, English, and Reading** – Faculty in these programs not only serve developmental needs, but have provided rich opportunities for advanced students as well. The College will continue to support and enhance upper-level classes and activities in these areas.

**Fine Arts** – These disciplines provide students the opportunity to be involved in the arts at every level, from creative inception to performance and production. The courses are focused primarily

on transfer preparation and provide rich co-curricular experiences for students, whether they are taking the courses to satisfy general education requirements or desire a career in the field. Exploration of dance and music technology courses is underway.

**Child Development and Education** – These courses prepare students to become educators whether their desire is to work with young children or to become teachers in a K-12 setting. Human Development theories are the underpinning of the program, and faculty collaborate with the psychology and sociology disciplines.

**Humanities, Social Science, and Behavioral Science** – These programs offer students tremendous opportunities for transfer preparation and a variety of ways to meet general education requirements. Faculty in many of these areas provide leadership to clubs and service organizations. Exploration is underway to enhance interdisciplinary studies and a multicultural curriculum.

**Communication and Language** – Coursework in communication and language prepares students to succeed in an increasingly multicultural world. The languages have been expanded to offer a variety of transfer options and to expose students to different cultures. Clubs and co-curricular activities enhance the classroom experience.

**Business and Information Technology** – Courses in this cluster include both transfer and workforce development opportunities for students. Instruction will strengthen the transfer components and determine how to use limited resources for workforce development classes.

**Health and Physical Education** – The mission in this area is to provide students with knowledge and skills for lifelong healthful living. Many of the courses transfer; others will be reviewed for relevance as budget problems continue or if funding levels change. Expansion into sports-related clubs (including aquatics, tennis, and golf) is being explored, particularly in light of the activation of new facilities.

More broadly, Instructional Area program directions include the following:

- Identify and meet student needs related to the College vision and mission.
- Implement best practices for managing and teaching, including experimentation and innovation.
- Model and reinforce collaborative approaches to meeting student needs.
- Seek out additional revenue streams, including grants and private donations.
- Encourage co-curricular activities such as clubs, participation in professional organizations, and internships.
- Expand Student Learning Outcomes assessment and continuous improvement until it becomes an integral part of the culture.
- Strengthen developmental education and support services.
- Expand honors curriculum and activities.
- Use organizational structure to offer opportunities for collaboration and sharing resources and not to define or limit programs.

### ***Student Services Program Directions***

Student Services has five overarching goals for the next three years:

- Manage funding and resources to minimize the loss of services to students as a result of the statewide budget cuts in the categorical programs. This effort will entail actively seeking alternative funding, consolidating service elements within existing programs, and expanding online resources to minimize the need for the direct intervention of personnel.
- Focus on providing equitable access to counseling and support by developing and expanding online services; conducting an equity audit to determine whether specific groups are underserved; engaging in planning to improve service to underserved groups; and providing an appropriate level of counseling support to all students.
- Promote and enhance student engagement by implementing an online orientation, increasing student involvement in shared governance and co-curricular activities, and supporting the goals and activities initiated under the CHC Title V grant (2005-10).
- Promote a transfer culture at CHC by seeking funding for a full-service Transfer Center, increasing articulation with four-year colleges and universities, and promoting transfer behaviors among both CHC students and students at our feeder high schools.
- Nurture a culture of continuous improvement, innovation, and collaboration. Decision-making will be evidence-based and characterized by rigorous discussion. All Student Services programs will participate fully in Program Review and will complete the annual SLO/SAO cycle.

Specific departmental directions are as follows:

Admissions and Records (A&R) is among the few departments on campus to serve each and every student. An important departmental goal is to offer accessible services to all students, including those enrolled in distributed education and evening classes. Strategies to meet the goal include the development, expansion, and implementation of online services and infrastructure. Over the next year, WebAdvisor will be gradually implemented in modules (including degree audit and registration), replacing the existing web portal. This task necessitates a great deal of collaboration with District Computing Services (DCS) and with the A&R staff of San Bernardino Valley College. The department has worked closely with DCS to improve the CCCApply and CCCTran processes and to digitize student records. In addition, the department will adopt strategies such as use of the Communication Management module of Datatel, and Twitter and RSS feeds to meet the communication needs of today's technologically astute students.

The Counseling department (which includes Transfer, Veterans, and International Students) experienced a reduction in staffing with the SERP retirement of a counselor in 2008. In addition, the statewide budget cuts in Matriculation resulted in the elimination of most adjunct counseling hours. Staffed now by only four full-time counselors, the department has been challenged to continue providing an excellent level of service to students. The department's major goal is to increase the effectiveness of counseling services. To reach the greatest number of students possible, the faculty has created plans to market educational planning in the spring to reach students who might otherwise wait until summer, increase support to Learning Communities, and increase on-campus and off-campus orientations. A second goal is to support transfer students

by developing major requirement information sheets, increasing the number of articulation agreements with feeder institutions, and participating in developing a Title V grant that focuses on transfer.

As with other categorical programs, the budget of Disabled Student Programs and Services (DSP&S) was decreased by about 51%. Though the district will backfill salaries through 2010-11, the department will be challenged to determine how to provide mandated services given anticipated reductions in staffing and operating funds. This year, two of the four full-time DSP&S staff members took the early retirement option. Next year's primary goal is to engage in planning to develop a service model that results in the best use of limited resources. Best practices and model programs will be examined to provide guidance for decision-making.

Like other categorical programs, Extended Opportunities Programs and Services (EOPS)/Cooperative Agencies Resources for Education (CARE) has experienced deep budget cuts with a low likelihood of regaining the lost funds in future allocations. The district has agreed to backfill salaries through 2010-11 only. Therefore, a primary goal of the department is to ensure the continuity of EOPS services and support. The department has been working closely with the Foundation Director to develop prospects for private donations, and will apply for grants when appropriate. In the fall, the Director will collaborate with others to write a federal Trio grant. A second goal is to refine existing resources and add new ones that allow for the efficient and effective use of staff time. For instance, an online orientation and application for EOPS students will be developed next year, and the department will partner with other units on campus to pool resources for services such as tutoring, a vital student services that is no longer affordable for the EOPS program. Last, EOPS will continue to refine the department's Student Learning Outcomes and Service Area Outcomes to better demonstrate the need for EOPS services and to position the department to receive resources when they become available.

Approximately 43% of CHC students receive some kind of financial aid. Financial Aid is fiscally stable to date, not having experienced the budget shortfalls that characterize the other categorical programs. Plans for next year include the implementation of the new year-round Pell; the refinement of the financial aid debit card, an innovation that was implemented this year; growth in aid awards of all types; and expansion of the outreach function to increase the number of students applying for financial aid opportunities.

The Health and Wellness Center experienced a significant budget reduction with the loss of district fiscal support in lieu of mandated cost reimbursement. At present, with the Student Health Fee as the sole source of income, the department is challenged to provide an optimal level of health education and services to CHC students. The department's primary goal is to partner with community and campus entities to maximize services to students within budgetary constraints. In addition, the department will need to ensure that funds are spent on the most necessary services. Therefore, a full survey of CHC students' health risk status, health behavior, and impediments to academic performance will be conducted so that evidence-based planning and resource allocation can be accomplished. Last, to enhance data-driven decision-making, maintain patient confidentiality, and expedite scheduling and cashiering, patient records will be electronically organized using a software package designed for that use.

Matriculation is a categorically funded program guided by statute and Title 5 regulations. Given the statewide budget cuts in categorical programs, and the administrative flexibility allowed to Matriculation funds, it is the goal of Student Services to manage Matriculation funding and resources to best serve students, and to minimize loss of service to students. Managers and faculty in Student Services will investigate best practices to develop alternative service and counseling models. A new online Orientation will be implemented in 2010-11, and outreach and assessment at feeder high schools will increase in order to prepare students from those schools better for college. Finally, a systematic evaluation of the effectiveness of Matriculation services will be undertaken, and recommendations will be incorporated into the Matriculation Plan.

The primary goal of the Office of Student Life (OSL) over the next three years is to increase student engagement by encouraging and tracking: 1) participation on shared governance bodies and 2) involvement in campus clubs and activities. Additionally, OSL will support both the Title V Passport program and the EOPS point accumulation system, which link incentives with participation in campus events and activities. A second overarching goal is to ensure that each of the professional standards of the Council for the Achievement of Standards in Higher Education (CAS) is reflected in OSL's planned events and activities. Finally, OSL will assess the student learning that takes place as a result of participation in OSL-sponsored activities.

## A Brief Introduction to Planning Terminology

The conceptual boundaries among strategic directions, goals, objectives, and actions are often vague: An objective under one initiative might be a goal under another, for example. The following is intended as a rough guide to understanding these terms as used in this Educational Master Plan, not a set of hard-and-fast rules.

### ***Strategic Direction***

*Definition:* An essential line of forward progress along which the institution seeks to move in the long run, and with which it seeks to align its resources and actions, to realize more fully its mission.

#### *Characteristics of a Sound Strategic Direction*

- Establishes the Big Picture, in concert with other Strategic Directions
- Serves to guide the planning and decision-making of the institution as a whole
- Well-defined subsidiary goals and objectives are required for effective pursuit of each Strategic Direction.
- Very long-range and stable over time (typically more than five years)

*Example:* Student Access and Success

### ***Goal***

*Definition:* A major aspiration that the institution intends to realize under a given Strategic Direction.

#### *Characteristics of a Sound Goal*

- Reflects the Big Picture
- Clearly serves the interests of the institution as a whole
- Ambitious—even audacious!—yet attainable in principle
- Achievement of the Goal represents significant progress in the applicable Strategic Direction.
- Relatively long-range and stable over time (typically three to five years), until it is achieved
- Shows applicable linkages to other planning structures or documents

*Example:* Meet the needs of individual learners.

### ***Objective***

*Definition:* A concrete, measurable milestone on the way to achieving a Goal.

#### *Characteristics of a Sound Objective*

- Relevant and significant with respect to the applicable Goal
- Brings the Goal down to earth in clear language
- Achievement of the objective represents significant progress toward achievement of that Goal.
- Achievement of all the objectives related to a Goal does not necessarily mean achievement of that Goal; it often represents completion of one phase of work that will continue with the formulation of additional Objectives and action plans.
- Achievable in typically one to two years
- Shows the tentative timeline or deadline for completion of the objective
- Shows the specific point person or group with overall responsibility for ensuring that progress on the objective occurs as planned

- May show estimated resources required for achievement
- Specific
- Measurable: Shows measures or sources of data for progress measurements, whether quantitative, qualitative, or both
- Reasonable
  - Scope
  - Timeline or Deadline
- Lends itself to formulation of a coherent set of Actions

*Example:* Provide mentors for at-risk students.

### **Action**

*Definition:* One of a coherent set of specific steps that must be taken to reach the Objective.

*Characteristics of a Sound Action*

- Specific
- Reasonable
  - Scope
  - Timeline (typically one year or less)
  - Workloads
- Completion of all the activities under an Objective means achievement of that Objective.

*Example:* Identify students for the Mentoring Program through self- and staff referrals.

## Institutional Quantitative Effectiveness Indicators

### *Introduction*

In its 2008 Recommendations, the Accrediting Commission for Community and Junior Colleges required Crafton Hills College (CHC) to “identify quantitative effectiveness measures (key performance indicators), gather baseline data and establish institutional planning goals.” The CHC Educational Master Planning Committee (EMPC), with the full participation of representatives of the Academic Senate, Classified Senate, Student Senate, and management team, has developed a set of institutional Quantitative Effectiveness Indicators (QEIs) in response to this recommendation.

Institutional QEIs, taken together, are intended to present a reasonably broad and accurate picture of overall institutional effectiveness from a quantitative perspective. Some of them overlap with measures already applied to courses, programs, and services, but they are not intended to gauge the effectiveness of particular programs or services, in part because programs and services can vary a great deal in these measures. Nor will they replace those more narrowly focused measures of effectiveness, both quantitative and qualitative, that programs and services across the College use for their program reviews, reports to external agencies, and other purposes. Data on QEIs will be gathered annually, starting with a baseline period, and results will show whether the College has made progress toward the improvement goal for each measure. The QEIs comprise one section of the Educational Master Plan (EMP), and progress toward the Goals of that Plan will raise the College’s performance level on many of the QEIs.

The top table on the next page, the *Initial Set for 2009-10*, summarizes the QEIs for which the EMPC developed Baselines and Targets. Additional measures that require further development, or that can provide external validation of College outcomes, appear in the second table on the next page, the *Recommended Candidates for Further Development*.

The subsequent pages contain detailed information on each 2009-10 QEI, including historical patterns, Baselines, and Targets. The Baseline is the starting point from which the College will measure progress on each measure. The Target represents the performance level that the College ought to be able to attain on each measure at the end of five years; each Target is intended to be ambitious, but reasonable.

**Institutional Quantitative Effectiveness Indicators**

**Table 7.1: Initial Set for 2009-10**

<b>Quantitative Effectiveness Indicator (QEI)</b>	<b>Rationale</b>
1. Course Success Rate <ul style="list-style-type: none"> <li>• Overall</li> <li>• Developmental Education/Basic Skills Courses</li> <li>• Transferable Courses</li> <li>• CTE Courses</li> </ul>	Fundamental measure of student success, used statewide for ARCC (Accountability Reporting for Community Colleges annual data collection and report) and other purposes.
2. Course Retention Rate <ul style="list-style-type: none"> <li>• Overall</li> <li>• Developmental Education/Basic Skills Courses</li> <li>• Transferable Courses</li> <li>• CTE Courses</li> </ul>	Fundamental measure of student success. Logically prior to Course Success Rate, since students must be retained before they can be successful.
3. Persistence	Students must continue their enrollment the next year in order to make progress on most educational goals, and to complete any degree and most certificates. Analogous to an ARCC college-level measure.
4. Degrees and Certificates	Fundamental measure of institutional performance, used statewide for ARCC and other purposes.
5. Transfer Rate	External measure closely related to the CHC mission and vision. Analogous to an ARCC systemwide measure.
6. Transfer Readiness Rate	Internal transfer-related measure that is not affected by the spaces available at four-year institutions and similar external issues.
7. Productivity: Instructional (WSCH/FTEF)	Fundamental measure of efficiency in the use of resources, frequently applied at institutions statewide, and tied to state funding practices.
8. SLO/SAO Process <ul style="list-style-type: none"> <li>• Progress</li> <li>• Improvement</li> </ul>	Outcomes are a major component of the accreditation standards, and CHC must continue to make progress in this area in order to meet accreditation requirements. Once all courses and programs have completed the SLO/SAO cycle and are fully engaged in continuing it, this QEI will likely be retired.

**Table 7.2: Recommended Candidates for Further Development**

<b>Quantitative Effectiveness Indicator</b>	<b>Comments</b>
Institutional SLOs Achievement Rate	Institutional SLOs are now in development, and measuring the achievement rate will not be possible this year. Outcomes are a major component of the accreditation standards, and CHC must continue to make progress in this area in order to meet accreditation requirements. This QEI is unlikely to be retired, because student achievement of institutional SLOs will be an ongoing concern.
Overall Student Satisfaction	Students who are satisfied with the institution are more likely to continue pursuing their educational goals at CHC than those who are not. The annual Student Satisfaction Survey is being revised.
Overall Employee Satisfaction	Employees who are satisfied in their work make the institution more effective overall. The Employee Campus Climate Survey is being revised.
Productivity: Noninstructional	Productivity in noninstructional units is difficult to measure, but efficiency in using resources is just as important in these areas as in instruction.
Performance After Transfer	External measure comparing GPA of CHC transfer students with that of native students at selected four-year institutions. This measure is made available now by only a few four-year institutions.
Progress from Basic Skills to College Level	Basic skills students should make progress toward college-level work. The methodology for tracking students through the course sequences requires specification. The ARCC measure is too limited.
Career Preparation <ul style="list-style-type: none"> <li>• Placement in Jobs</li> <li>• Employer Feedback</li> </ul>	Both listed categories will probably require survey development, administration, and analysis. The methodology requires specification.
Alumni Satisfaction/Participation	Proportion of surveyed alumni reporting satisfaction with their outcomes at CHC, or continued engagement with the institution.
Diversity/Inclusion/Representativeness	The measurement methodology, especially regarding comparison groups, requires specification.

**Quantitative Effectiveness Indicator (QEI) 1 – Course Success Rate**

*Overall Course Success.* Success rate is defined as the number of A, B, C, or CR/P grades divided by the total number of grades on record, or GOR (A, B, C, D, F, CR/P, NC/NP, W or I). The total number of GOR represents the number of students enrolled at census.

*Developmental/Basic Skills Course Success.* Developmental/basic skills course success refers to the success rate in courses coded for state reporting purposes as basic skills, or in courses in math, reading, or English considered to be developmental courses. (Refer to Table 12 for a list of all developmental/basic skills courses.)

*Transfer Course Success.* Transfer course success refers to the success rate in courses coded for state reporting purposes as transferable to both UC and CSU or transferable to CSU only. Also includes courses identified by CHC as transferable to some but not all CSUs and UCs. (Refer to Table 10 for a list of the transferable courses.)

*Career Technical Education (CTE) Course Success.* CTE course success refers to the success rate in courses coded for state reporting purposes as advanced occupational or clearly occupational, and as credit – degree applicable or credit – not degree applicable. (Refer to Table 11 for a list of the CTE courses.)

Success	5-Year Average			Target	Target Rationale
	#	N	%		
CTE	29,011	35,852	80.9	<b>80.0%</b>	Maintain already high success rate.
Transfer	80,802	115,614	69.9	<b>73.4%</b>	Mean of CHC transfer course success rates over the last 5 years, excluding both highest and lowest rates.
Developmental	13,852	23,803	58.2	<b>63.0%</b>	Continue the excellent progress already demonstrated over the past 5 years.
Overall	116,359	165,032	70.5	<b>73.4%</b>	Match Transfer success rate.

Note. “#” refers to the number of successful grades, “N” refers to the number of GOR, and “%” is # divided by N. Excludes courses with less than 10 GOR over five years. The number of records excluded because of the number of GOR ranged from 1 to 46 in each of the four success rate areas. **Yellow** – recommended ambitious but reasonable five-year target. Where possible, preference was given to success rates generated at Crafton.

### Quantitative Effectiveness Indicator (QEI) 2 – Course Retention Rate

*Overall Course Retention.* Retention rate is defined as the number of A, B, C, D, F, CR/P, NC/NP, or I grades divided by the total number of grades on record, or GOR (A, B, C, D, F, CR/P, NC/NP, W or I). The total number of GOR represents the number of students enrolled at census.

*Developmental/Basic Skills Course Retention.* Developmental/basic skills course retention refers to the retention rate in courses coded for state reporting purposes as basic skills, or in courses in math, reading, or English considered to be developmental courses. (Refer to Table 12 for a list of all developmental/basic skills courses.)

*Transfer Course Retention.* Transfer course retention refers to the retention rate in courses coded for state reporting purposes as transferable to both UC and CSU or transferable to CSU only. Also includes courses identified by CHC as transferable to some but not all CSUs and UCs. (Refer to Table 10 for a list of the transferable courses.)

*Career Technical Education (CTE) Course Retention.* CTE course retention refers to the retention rate in courses coded for state reporting purposes as advanced occupational or clearly occupational, and as credit – degree applicable or credit – not degree applicable. (Refer to Table 11 for a list of the CTE courses.)

Note. “#” refers to the number of retained students, “N” refers to the number of GOR, and “%” is # divided by N.

Table 7.4A: Five-Year Targets using the Five-Year Average Retention Rate as a Baseline

Retention	5-Year Average			Target	Target Rationale
	#	N	%		
CTE	33,099	35,852	92.3	<b>92.0%</b>	Maintain already high retention rate.
Transfer	99,430	115,614	86.0	<b>88.0%</b>	Increase slightly over already solid retention rate.
Developmental	19,367	23,803	81.4	<b>85.1%</b>	Continue the excellent progress already demonstrated over the past 5 years.
Overall	142,861	165,032	86.6	<b>88.0%</b>	Increase slightly over already solid retention rate.

Note. “#” refers to the number of retention grades, “N” refers to the number of GOR, and “%” is # divided by N. Excludes courses with less than 10 GOR over five years. The number of records excluded because of the number of GOR ranged from 1 to 46 in each of the four retention rate areas. **Yellow** – recommended ambitious but reasonable five-year target. Where possible, preference was given to retention rates generated at Crafton.

Figure 7.2: QEI 2 – Course Retention Rate by Academic Year from 2004-05 to 2008-09 with Targets

**Quantitative Effectiveness Indicator (QEI) 3 – ARCC Persistence**

*ARCC Persistence (Fall to Fall).* Percent of first-time students with a minimum of six units earned in a Fall term and who returned and enrolled in a credit course the subsequent Fall term anywhere in the system. Students who transferred to a four-year institution or received an award prior to the subsequent Fall term are removed from the cohort, so they do not affect the rates.

Table 7.5: QEI 3 – Fall to Fall ARCC Persistence Rate from 2004-05 to 2007-08

Time Period	Persistence		
	#	N	%
Fall 2004 to Fall 2005	457	679	<b>67.3</b>
Fall 2005 to Fall 2006	447	664	<b>67.3</b>
Fall 2006 to Fall 2007	484	724	<b>66.9</b>
Fall 2007 to Fall 2008	535	814	<b>65.7</b>

Note. “#” refers to the number of students who earned a GOR in the subsequent fall semester, “N” refers to the number of first-time students who earned at least six units in the initial fall semester, and “%” is # divided by N.

Table 7.5A: Baseline and Five-Year Target for Fall to Fall ARCC Persistence

Baseline	Persistence			Target	Target Rationale
	#	N	%		
Fall 2007 to Fall 2008	535	814	<b>65.7</b>	<b>70.3%</b>	Raising persistence rate is crucial to improving students’ success in achieving transfer, degree, and many certificate goals, so the target is ambitious.

Note. “#” refers to the number of students who earned a GOR in the subsequent fall semester, “N” refers to the number of students who earned at least six units in the initial fall semester, and “%” is # divided by N. **Yellow** – recommended ambitious but reasonable five-year target.

Figure 7.3: Baseline and Five-Year Target for Fall to Fall ARCC Persistence with Target

**Quantitative Effectiveness Indicator (QEI) 4 – Degrees and Certificates**

*Degrees and Certificates.* The number of degrees and certificates earned by CHC students. Certificates that are less than 18 units are included.

Table 7.6: QEI 4 – Degrees and Certificates Earned from 2001-02 to 2008-09

Academic Year	Certificates	Degrees	Totals
2001-02	504	471	975
2002-03	399	532	931
2003-04	440	258	698
2004-05	346	344	690

2008-09	475	326	801

Table 7.6A: Baseline and Five-Year Target for Number of Degrees and Certificates Earned

Baseline	Certificates	Degrees	Totals	Target	Target Rationale
Most recent year	475	326	801	<b>800</b>	Maintain recent high level in a volatile measure.

**Yellow** – recommended ambitious but reasonable five-year target.

Figure 7.4: QEI 4 – Degrees and Certificates Earned from 2001-02 to 2008-09 with Target

**Quantitative Effectiveness Indicator (QEI) 5 – Transfer Rate**

*Transfer Rate.* Percent of first-time Crafton Hills College (CHC) transfer students with a minimum of 6 transferable units earned who attempted a transfer math or English course within three years and who are shown to have transferred to a four-year university as identified by UC, CSU, or the National Student Clearinghouse.

*First-time CHC Transfer Student.* A student was counted as a first-time CHC student if the first term in which he or she earned a GOR in the San Bernardino Community College District (SBCCD) was the summer or fall semester of the initial cohort year at CHC. A student was counted as earning six transferable units if he or she did so in the three-year period (e.g.: 2002-03 to 2004-05). A student was counted as attempting a transfer math or English course if he or she earned a GOR in any transfer math or English course within the three-year period. A *first-time CHC transfer student* earned his or her first GOR at Crafton, completed six transferable units within three years, and attempted a transfer math or English course within three years.

Table 7.7: QEI 5 – Three Year Transfer Rate for Five Cohorts Ending in the following Years: 2004-05, 2005-06, 2006-07, 2007-08, and 2008-09

Time Period	Transfer Rate		
	#	N	%
2002-03 to 2004-05	507	1,936	26.2
2003-04 to 2005-06	567	1,997	28.4
2004-05 to 2006-07	576	1,970	29.2
2005-06 to 2007-08	540	1,929	28.0
2006-07 to 2008-09	588	2,084	28.2

Note. “#” refers to the number of students who transferred to a four-year institution as identified by the National Student Clearinghouse, “N” refers to the number of students who earned their first GOR at Crafton, completed six transferable units within three years, and attempted a transfer math or English course within three years., and “%” is # divided by N.

Table 7.7A: Baseline and Five-Year Target for the Transfer Rate

Baseline	Transfer Rate			Target	Target Rationale
	#	N	%		
5-Year Average	2778	9916	28.0	<b>32.8%</b>	Transfer is a major part of both the mission and the vision of CHC. Reaching this target will mean students are achieving their transfer goals both sooner and at a higher rate.

Note. “#” refers to the number of students who transferred to a four-year institution as identified by the National Student Clearinghouse, “N” refers to the number of students who earned their first GOR at Crafton, completed six transferable units within three years, and attempted a transfer math or English course within three years, and “%” is # divided by N.

**Yellow** – recommended ambitious but reasonable five-year target.

**Quantitative Effectiveness Indicator (QEI) 6 – Transfer Readiness Rate**

*Transfer Readiness.* Percent of first-time Crafton Hills College (CHC) transfer students with a minimum of 6 transferable units earned who *attempted a transfer math or English course* within three years and who are shown to have completed 60 transferable units with a 2.00 GPA and who have successfully completed transfer level math and English.

*First-time CHC Transfer Student.* The first term in which the student earned a GOR in the SBCCD. A student was counted as a first-time college student if the first term in which he or she earned a GOR in the San Bernardino Community College District (SBCCD) was the summer or fall semester of the initial cohort year at CHC. A student was counted as earning six transferable units if he or she did so in the three-year period (e.g.: 2002-03 to 2004-05). A student was counted as attempting a transfer math or English course if he or she earned a GOR in any transfer math or English course within the three-year period. A *first-time CHC transfer student* earned his or her first GOR at Crafton, completed six transferable units within three years, and attempted a transfer math or English course within three years.

2006-07 to 2008-09	141	2,084	6.8

Note. “#” refers to the number of students who transfer ready, “N” refers to the number of students who earned their first GOR at Crafton, completed six transferable units within three years, and attempted a transfer math or English course within three years., and “%” is # divided by N.

**Quantitative Effectiveness Indicator (QEI) 7 – Instructional Productivity**

*Instructional Productivity.* The productivity measure used for instruction is the Weekly Student Contact Hours (WSCH) per Full Time Equivalent Faculty (FTEF, also known at CHC as Faculty Load) ratio. For this measure, WSCH is defined as the number of students in a class at census multiplied by the hours of student instruction conducted in that class in a week during a primary (fall or spring) term of an academic year. As an illustration, in a typical 3-unit course:

- One student generates 3 WSCH (3 weekly hours \* 1 student at census = 3 WSCH)
- Ten students generate 30 WSCH (3 weekly hours \* 10 students at census = 30 WSCH)
- Thirty students generate 90 WSCH (3 weekly hours \* 30 students at census = 90 WSCH)
- Thirty-five students generate 105 WSCH (3 weekly hours \* 35 students at census = 105 WSCH).

FTEF refers to the load factor associated with each section assignment for an instructor. As an illustration, typically one 3-unit fall section that meets 3 hours a week represents a load factor of .20 or 20%. A full-time load in one primary term is considered to be 1 FTEF, or the equivalent of five 3-unit sections. The load factor associated with a section varies depending on the unit value of the course.

Thirty-five students in a typical 3-unit weekly census course with a .20 load factor generate a WSCH/FTEF ratio of 525 (3 \* 35 = 105 / .20 = 525). Dividing the total WSCH from all sections by the total FTEF associated with all sections yields the College-wide WSCH/FTEF ratio. The WSCH/FTEF ratio norm for California community colleges is 525.

Target: Reach the Proficiency level on the Accrediting Commission for Community and Junior Colleges *Rubric for Evaluating Institutional Effectiveness – Part III: Student Learning Outcomes* no later than Fall 2012.

## Long-Range Financial Plan and Forecast

To assist College departments in planning for long-term resource allocations, Fiscal Services updates the following *Long-Range Financial Plan and Forecast* for Crafton Hills College at least annually. It is based in part on the District Resource Allocation Model approved in Spring 2010.

Scenarios A and B represent a range of assumptions from conservative to optimistic. Neither, however, accounts for yearly budget interventions, significant changes in college services, or other District/College changes. Moreover, it is important to note that since final decisions on filling SERP and 2009-10 vacancies have not been made as of publication of this Plan, none of the projected scenarios includes expenditures for filling any of those vacancies. See *Revenue, Expenditure, and Other Forecast Assumptions* below for factors that are taken into consideration.

Scenario A illustrates a "conservative" projection of revenues, assessments, and expenditures. Line items resulting from State allocations such as FTES Credit and Noncredit Funding rates, Growth allocations, COLA, PT Faculty, and Lottery Funds are assumed with 0% increases. Other line items such as Interest Income and Other Campus Revenues are also assumed with 0% increases. This scenario assumes marginal increases in District assessments and College expenditures.

Scenario B illustrates an "optimistic" projection of revenues, assessments, and expenditures. Line items resulting from all allocations including FTES Credit and Noncredit Funding rates, Growth allocations, COLA, PT Faculty, Lottery Funds, Interest Income, and Other Campus Revenues are assumed with varying percent increases based on historical trends. This scenario assumes moderate increases in District assessments and College expenditures.

## Planning Context: College Characteristics

### *Student Demographics*

In 2008-09 females slightly outnumbered males at CHC; however, from 2006-07 to 2008-09 the proportion of females and males has remained steady at approximately 49% (see Table 9.1).

Table 9.1: Number and Percent of Students by Gender and Academic Year from 2006-07 to 2008-09

Unknown	143	1.6	142	1.5	92	1.0
Total	8,812	100.0	9,285	100.0	9,517	100.0

Students at CHC are more likely to be White (53.7%) or Hispanic (25.8%, see Table 9.2). In the last three years from 2006-07 to 2008-09 there has been a decrease in the percentage of White students from 56.4% in 2006-07 to 53.7% in 2008-09. At the same time, there have been slight increases in the percent of Asian, African American, and Hispanic students.

The average age of CHC students has remained steady over the last three years from 2006-07 to 2008-09 ranging from 26.1 to 27.0. In 2008-09 the average age of CHC students was 26.1. In addition, students at CHC are more likely to be 20-24 years old (30.6%), 19 years old or younger (27.4%), or 25-29 years old (13.5%, see Table 9.3), which comprises approximately 71.5% of the students at CHC.

Note. Students identified as having a disability received services from the Disabled Students Programs and Services (DSP&S) in the respective academic year. Students not identified as receiving services from DSP&S might have had a disability that was not identified by the college.

### ***Employee Demographics***

The percent of administrators has remained relatively the same from Fall 2006 to Fall 2008 at approximately 5% (see Table 9.5). The percent of tenured or tenure track faculty has decreased slightly from 26.6% in Fall 2006 to 21.3% in Fall 2008, while the percent of academic temporary faculty (i.e. adjunct) has increased from 31.6% in Fall 2006 to 43% in Fall 2008. In addition, the percent of classified staff has decreased from 36.5% in Fall 2006 to 31.3% in Fall 2008.

Table 9.5 also illustrates the proportion of females and males by employee type and term. Overall, in the last three years there has been a slightly higher proportion of females than males, ranging from 53.6% to 56.5%. The proportion of administrators and tenured or tenure track faculty has remained relatively equal over the last three years at approximately 50%. At the same time, in Fall 2008 there was a higher proportion of classified staff who were female (65.7%), and a higher proportion of academic temporary faculty who were female (53.6%). In addition, the percent of academic temporary faculty who are female has increased from 43.8% in Fall 2006 to 53.6% in Fall 2008.

Table 9.6 illustrates the number and percent CHC employees by ethnicity and term from Fall 2006 to Fall 2008. The proportion of White employees has decreased from 71.1% in Fall 2006 to 68.3% in Fall 2008, while the proportion of Asian and African American employees has slightly increased. In Fall 2008 46.7% of the Educational Administrators at CHC were Hispanic (23.5%), Asian (17.6%), or African American (5.6%).

The percent of CHC employees 50 years old or older has declined from 48.4% in Fall 2006 to 43.5% in Fall 2008 (see Table 9.7). Conversely, the percent of employees 34 years old or younger has increased from 17.8% in Fall 2006 to 20.8% in Fall 2008. In Fall 2008 Educational Administrators were more likely to be 45-49 years old (23.5%) or 60-64 years old (23.5%), Tenured or Tenure Track faculty were more likely to be 50-59 years old (46.1%), and Classified Staff (27.8%) and Academic Temporary faculty (26.1%) were more likely to be 34 years old or younger.

Table 9.8 indicates that only approximately 1.3 to 1.8% of CHC employees identified themselves as having a disability.
