I. **Administrative Reports**
   A. **Vice President of Instruction, Cheryl Marshall**
      1. Overall goals
         a. Quality programs that promote student success. Need to be persistent in our efforts to plan sequences of courses that help students reach educational goals.
         b. Managed growth – want to grow but still maintain quality. Need to look at scheduling and course offerings, including online and off campus classes.
         c. Partnerships need to be increased. Want to increase recruits from feeder high schools. Only about 30% prepared to go on to a 4 year so we need to reach out to the other 70%. Eventually would like to look at junior highs and start recruiting earlier. Need more partnerships with 4 year institutions as well as business and industries. Also need to work on more collaboration internally.
         d. Better measuring of progress. Need to move more to data based decisions and help college staff be more understanding and accepting of this type of system. We need to look at outcomes of students but also need to assess student satisfaction and well as our reputation.
         e. Planning in relation to goals. A plan is a tool. Also serves as an assessment. Where do we want to go, are we getting there?
      2. Work style
         a. Believes we all need to be learners, need to look at both the science and art of teaching.
         b. Work needs to be meaningful.
         c. Believes in open communication and collaboration. Supports innovation and creativity.

Suggestion from faculty to place boxes at other places on campus as well. Victor Cisneros, treasurer of SS and president of the math club gave a brief introduction to the math club. Announced a few of the math club accomplishments from last year and his desire to expand the club and its activities this year. Wants to go to the JPL (Jet propulsion laboratory) in Pasadena and the proton accelerator at Loma Linda. Meet in the cafeteria. Encouraged faculty to announce math club and other clubs on campus. VI. Old Business
A. Action Item, 2nd Reading: Resolution F07.01 College Hour
   Motion: To approve for second reading (Brink, White, MSC 3 opposed)
   Discussion: Question about details – will be dealt with more in other meetings, specifically Scheduling Task Force and the Chairs Committee. Some Career and Tech concern with statutory requirement issues and science labs. Other suggestions/concerns: meaningfulness of the activity, participation of the instructors, timing and maintaining efficiency of scheduling. This is only a recommendation, will not be mandatory.

VII. New Business
A. Discussion: Distributed Education Plan 2007-2010
   Question: Can we require higher standards for teaching online courses than FTF? Yes, it was in the plan that was approved 3 years ago. Suggestion to change title, correct grammatical errors. Any CTA conflicts? Evaluation in this document is of the course, not the faculty member. Also looking at putting current faculty evaluation tool into an online format.
   B. Discussion: AR 3710 Intellectual Property and Copyright
      Motion: Move to approve for first reading (Brink, Perez) withdrawn
      Discussion: Is this too dense to discuss? Does it need to be rewritten or simply passed back to district? Indication that perhaps we do need to have an opportunity for written comments. Will meet with district and come back with comments.
