

CHC Program Definition

- CHC programs include: all Instructional Disciplines, Instructional Support Services, Student Support Services, and Administrative Support Services. All programs at Crafton Hills College fall into one of these four organizations units as defined below. CHC programs are reviewed annually as a part of the annual planning and program review process. Additionally, some programs may be grouped together on an operational basis, particularly when shared staff or facilities are involved.
 - **Instructional Programs:** An instructional discipline, such as biological sciences or computer information systems. An instructional program refers to one or several instructors working together to teach courses and help students advance toward a certificate or degree whose primary coursework is in the instructional discipline. Instructional Programs at CHC may be grouped together on an operational basis, particularly when shared staff or facilities are involved, such as is the case with Business/Accounting/Marketing.
 - **Instructional Support Programs:** Instructional support programs are designed specifically to help students succeed in the classroom. These programs provide additional support and assistance to students, instructors, instructional assistants. The goal of instructional support programs is to maximize individual student success at Crafton Hills College. Examples of instructional support programs include the Tutoring Center, Distance Education, Honors and the STEM Program.
 - **Student Services Programs:** Student Services Programs are designed to maximize individual student success and to support their progress at the college, while at the same time serving as a screening process for students who may need specialized support or services. Examples include Counseling, EOPS/CARE, DSPS, and the Transfer Center. In many but not all cases, such programs are supported by categorical funds dedicated to specific outcomes and are accountable to meeting those outcomes to maintain funding.
 - **Administrative Support Programs:** Administrative Support Programs are designed to support all the educational processes on campus, including all the facilities on campus as well as all the technology provided to students, faculty, and staff. Organization of programs within Administrative Support is based on how to best serve students.
