Benefits of an Online or Hybrid Course

The benefit of an online or hybrid education course is its flexibility. The fact that the course is offered at a distance makes it possible for **highly-motivated** and **well-organized** students to learn without the obligation of attending class on campus once, twice or three times a week. Having said that, online and hybrid courses require students be **independent learners**. **"With great freedom comes great responsibility."**

To succeed, you must:

- Demonstrate dedication, self-motivation, and the ability to work independently
- Demonstrate concern for your performance throughout the course, not just during the last few weeks of the semester.
- Schedule several times each week which you will devote to your online course, in the same way you attend a traditional class at the same time each week.

Are you ready to succeed online? To find out if online learning is a good fit for your learning style, you will want to complete the Quest for Online Student Success Course, preferably before the beginning of the new term.
