### 31 Reflection(s)

- Looking on the overall data, I would say that while lower than normal semesters, having at least 55% of the course getting a 3, or 4 meets the criteria of meeting the SLO's. There are a lot at play when it comes into students for the last couple years, and I believe we will continue to see this trend continue for a little while before it tapers off. This trend in students that are not fully prepared for higher education both academically, and socially, is by far a side effect of the pandemic and its effects on society. I think that we as instructors should continue to push our students, but also keeping in mind these trends, consider offering more leniency, and support, especially to help our students who may have been marginalized during those times. Note: Students who received the 1, are students who will likely get a FW, as they stopped coming.

- Overall, the class did a great job. The students seemed to be engaged and the success rate was high. This SLO in particular had low participation (14/30) and did not meet the goal.  
(COMMST-111-72 for 2024FA)
- Cannot complete this as it is an incomplete roster. Notified Research.  
(COMMST-135-70 for 2024FA)
- These student did well in class but more participation was needed in the SLOS  
(COMMST-111-73 for 2024FA)

- Based on the average, I need to go more in depth about listening and include more activities to assist students in understanding the importance of bringing these concepts into their everyday lives. (COMMST-111-60 for 2024FA)
- Inquire why students who dropped the course are still showing on this list.
