Do you have any recommendations for the class schedule and/or services?

Do you have any recommendations for the class schedule and/or services?

Na

Balancing online versus in-person class distributions, offering wider time offerings per section

Some classes I need are only available during the day and not evening hours

If it is possible to make MATH 102 also asynchronous, that is the only class I have seen that does not offer this. That is the only class that I have to come too in person and sometimes it is hard to go in person when there's a lot to do some days.

do not go to the 16 week schedule it is going to be too difficult to juggle all the responsibilities and have a shorter time to learn the material

Have pilates available in the morning

none

Please not have one class be done by just one professor and at only one time. I like it better if we have options. I wouldn't mind having a class be taught by one professor—but I would like to have more time options when registering instead of early morning.

I would recommend ensuring that ALL classes have at least one section offered in person. A lot of people do not do well online, so when the only option for a required class is online, it can make it very difficult for them to reach their educational goals.

Whenever possible make courses available for students to complete the major requirements in one semester whenever possible. Two semesters at most.

To have one due dates for submission, instead of doing too much dates on when to submit

I want all classes to have the option for either in-person or online. It is very annoying when some classes are only offered online and even worse if they are only offered asynchronously.

Please offer more Online Async classes for working professionals.

more time options for classes for example (ETHICS 101-54 8:00-9:00,1:00-3:00 ect.)

Have kinesiology classes in the evening so more people can take the classes.

Hybrid classes (in-person instruction with online assignments) are pointless when in-person classes assign online assignments anyways.

English Major is missing classes required for transfer and some 100 level english courses are not transferable.

No

Clear any conflicts in STEM classes (such as with the linear algebra and physics 2 classes in spring)

Evening and weekend classes are needed. But more importantly are teachers that actually teach. Most the classes I've taken I could have gained the exact same education through YouTube.

Do you have any recommendations for the class schedule and/or services?

More evening and weekend on campus classes for working adults

More online availability for classes like Bio labs

N/A

More online classes.

Activity classes should be in the afternoon to not conflict with core academic classes.

More courses exclusively online

No

have more in-person classes available

Availability of In-Person Spanish IV, late afternoon or at night.

In Person Classes

N/A i prefer some online some in person.

No

None

more staff should be willing to come onto campus to teach, teaching online is easy and lazy in comparison, and the student benefits very little in online learning.

offer more classes in person

No

Need more in person classes please, online is not how I learn. Online only is laziness..

Grants for either single mothers and or married going to school at least taking 3 units to promote moms to go back to school

More offering times

no

More in-person options/times!!!!

More online courses

More physics professors

Crafton hasn't the extensive catalogue like it's sister schools

Do you have any recommendations for the class schedule and/or services?

As a stay at home parent to school aged children, it would be great to have science courses available at 9am after dropping off the kids at school. Instead of in the middle of the day.

None

You need professors that want to teach.

please offer CIS 132, and CIS 133

Thank you for providing different options for students to take classes.
