### MEDICAL WASTE - SQG - Onsite Med Waste Treatment

Based on an inspection this day, the items marked below identify the violation(s) in operation or facilities which must be corrected. Failure to correct listed violation(s) prior to the designated compliance date may necessitate an additional inspection to be billed at the hourly rate as provided in the San Bernardino County Code, [Schedule of Fees](#).

Administrative Order to Show Cause (OSC): The Permittee has the right to a hearing if requested in writing within 15 calendar days of receipt of this notice,

See the following pages for the code sections and general requirements that correspond to each violation listed below.

#### 48K062 Storage - Sharps Containers

Compliance Date: Not Specified

Not In Compliance

Reference - HSC - 118285

**Inspector Comments:** Per person in charge (Craig), sharps are transferred from smaller sharps bin to large sharps bin in designated accumulation area.

Discontinue this practice to prevent possible injury. Once sharps containers are filled they can not be reopened or re- handled. Properly dispose of full sharps containers.

**Description:** To containerize sharps waste, a person shall do all of the following: (a) Place all sharps waste into a sharps container. (b) Tape closed or tightly lid full sharps containers ready for disposal to preclude loss of contents. (c) Store sharps containers ready for disposal for not more than thirty days without the written approval of the enforcement agency. (d) Label sharps containers with the words "sharps waste" or with the international biohazard symbol and the word "BIOHAZARD".

#### Overall Inspection Comments

An annual routine inspection was conducted on this date. Inspector was accompanied by representatives of the facility, Michael Strong and Dave Stevenson.

This facility has a SQG On-site Treatment health permit for the on-site autoclave in the lab. Other medical waste generated is from student health services and the EMS and Paramedic school on campus. In the microbiology lab, the autoclave was inspected. Onsite treatment paperwork was reviewed during this inspection. Spore testing, SOP, autoclave record/printout and heat sensitive tape were observed during the inspection. The annual autoclave preventive maintenance paperwork indicated thermometer calibration was conducted. The 2023 calibration records were missing at the time of inspection.

Please contact the Medical Waste Program at 800-442-2283 if you have any questions.
