Academic Integrity Example

In this course, I want to help you make choices reflecting integrity and responsible actions. Academic integrity means honesty in academic work. All work and all grades are results from the participants own effort. However, one may feel pressure by the amount of work needed to accomplish a task. Yet violating academic integrity policies (link to campus policies) can compromise one's academic career.

Here is some **inspirational advice offered by Massachusetts Institute of Technology (MIT)** ⤷ **(https://integrity.mit.edu/)** to help manage workload and prevent the temptation to "take a short-cut."

Build Academic Integrity

Do	Don't
Trust the value of your own intellect.	Don't purchase papers or have someone write a paper for you.
Undertake research honestly and credit others for their work.	Don't copy ideas, data or exact wording without citing your source.

Collaborate Wisely

Do	Don't
Trust the value of your own intellect.	Don't collaborate with another student beyond the extent specifically approved by the instructor.

Avoid Cheating

Do	Don't
Demonstrate your own achievement.	Don't copy answers from another student; don't ask another student to do your work for you. Don't fabricate results.

	Don't use electronic or other devices during exams.
Accept corrections from the instructor as part of the learning process.	Don't alter graded exams and submit them for re-grading.
Do original work for each class.	Don't submit projects or papers that have been done for a previous class.

Foster Academic Honesty

Do	Don't
Showcase your own abilities.	Don't allow another student to copy your answers on assignments or exams. Don't take an exam or complete an assignment for another student.

- See... Even students in ivy league schools feel the pressure to cut corners.
