

Institution-Set Standards

The institution-set standards are reviewed annually by the Institutional Effectiveness, Accreditation, and Outcomes Committee and were developed at Crafton Hills College in 2013. In setting the standards, Crafton worked from the ACCJC guidance that the college should not fall below the number or rate that was set. If the college did fall below this number, then it would focus more energy and resources than normal to increase the College rate. At the time, the College adopted the common approach of calculating a five-year average and using one standard deviation below the average to identify a minimum. This approach was used, because the College felt that a decrease of one standard deviation represented a substantial decrease. There is an important distinction between the institution-set standards and the College's stretch goals. The Educational Master Plan Committee annually reviews the College's stretch goals, which are separate from the institution-set standards.

The College has identified the following institution-set standards: 63.6% for successful course completion, 204 certificate completions annually, 250 degree completions annually, and 163 transfers annually.

Institution-Set Standards and the 2018-2019 Measure for Successful Course Completion, the Number of Certificates and Degree Completions, and the Number of Transfers for 2018-2019.

Data Element	Definition	Institution-Set Standard	2018-2019 Outcome
Course Completion (Success) Rate	The number of students earning a "C" grade or better divided by the number of grades at census multiplied by 100 in the fall semester. Represented as a percent of students successfully completing a course.	63.6%	73.8%
Certificates	The annual number of students earning certificates which are awarded with 16 or more units.	204	296
Degrees	The annual number of students earning AA/AS degrees. This excludes transfer degrees.	250	472
Transfer	The annual number of transfers to four-year universities. Includes CSUs, UCs, Private, and Out-of-State universities.	163	497

Successful Course Completion

Crafton Hills College has an institution-set standard of 63.6% for the successful course completion rate. The stretch goal is 73%. The institution-set standard and the stretch goal were set based on the fall successful course completion rate. This was the first year in which the ACCJC Annual Report requested the successful course completion rate as annual number, and not the fall number. Accordingly, the rate increase because summer was included, which tends to have a course completion rates. The Institutional Effectiveness, Outcomes, and Assessment Committee will be reviewing the institution-set standards and stretch goals to adjust for this change. When examining the fall course success rates the College has not been able to sustain the 73% target for

more than one semester. In the five years the annual successful course completion rate has ranged from 72.5% to 73.8%.

Course success rates have remained relatively consistent and well above the institutional set standard across all ethnic groups, except with respect to African American students. The success rate observed among African American students has declined from a five-year peak of 70% in 2016-17 to 62% in 2018-2019. These findings have spurred college action, particularly with respect to the enhanced efforts towards identifying the potential reasons underlying this achievement gap (see standard I.B.3).

Successful Course Completion Rates by Ethnicity from 2014-2015 to 2018-2019.

Success rates have also remained consistent across age groups, all of which achieved success rates well above the institutional set standard. Consistent with past findings, older students generally achieved higher course success rates than younger students.

Success rates have also remained consistent for male and female students, all of which achieved success rates well above the institutional set standard. In fact, the success rates across both gender groups remained similar across the five-year period between 2014-15 and 2018-19. The course success rates of students for whom no gender is recorded has varied from year-to-year, largely due to the small numbers of students per year (ranging from zero to eight).

Certificates

Crafton Hills College has an institution-set standard of 204 certificates earned annually. The stretch goal is 255. The institution-set standard and the stretch goal are based on the annual number of 16 or more unit certificates earned. In the last five years the number of annual 16 or more unit certificates earned has ranged from 225 to 339 certificates. Crafton has not been able to sustain meeting the stretch goal of 255; however, in the last three years the number of certificates earned has increased from 225 in 2016-2017 to 296 in 2018-2019.

The certificates earned by student ethnic groups have largely mirrored groups' corresponding representation across the entire campus. One pattern that perhaps best reflects this idea is the declining percentage of certificates earned by Caucasian students (48% in 2014-15 and 39% in 2018-19) and the increasing percentage of certificates earned by Hispanic students (36% in 2014-15 and 47% in 2018-19), both of which are consistent with the broader changes in the corresponding student populations.

The certificates earned by student age group indicate that, on average, student earning a certificate were between the ages of 20 and 29 years of age, consistent with broader student population. However, the percentage of students between 20 and 24 earning a certificate has increased over time (increasing from 37% in 2015-16 to 58% in 2018-19), and the percentage of students between the ages of 25 and 29 years of age earning a certificate has decreased (from 49% in 2014-15 to 22% in 2018-19).

The certificates earned by gender has changed by 3-4 percentage points since 2015-16. Specifically, the percentage of males earning a certificate has declined from 53% in 2015-16 to 49% in 2018-19, and the percentage of female students earning a certificate has increased from 48% in 2015-16 to 51% in 2018-19. All of these findings are, of course, in sharp contrast to those reported the 2014-15 academic year.

Degrees

Crafton Hills College has an institution-set standard of 250 AA/AS degrees earned annually. The stretch goal is 450. The institution-set standard and the stretch goal are based on the annual number of AA/AS degrees earned. In the last five years the number of annual degrees earned has ranged from 427 to 476 degrees. Crafton has not been able to sustain meeting the stretch goal of 450 for more than two consecutive years; however, in the last two years the number of degrees earned has increased from 427 in 2017-2018 to 472 in 2018-2019.

As is the case with certificate attainment, the AA/AS degrees earned by student ethnic groups have largely mirrored groups' corresponding representation across the entire campus. The pattern that perhaps best reflects this idea is the declining percentage of degrees earned by Caucasian students (50% in 2014-15 and 39% in 2018-19) and the increasing percentage of degrees earned by Hispanic students (38% in 2014-15 and 45% in 2018-19), both of which are consistent with the broader changes in the corresponding student populations.

Transfers

Crafton Hills College has an institution-set standard of 163 transfers earned annually. The stretch goal is 665. The institution-set standard and the stretch goal are based on the annual number of transfers to four-year universities. In the last five years the number of annual transfers earned has ranged from 302 to 545. Crafton has not been able to reach the stretch goal of 665.

The transfers to CSU campuses have remained relatively consistent across student ethnic group, except with respect to Caucasian and Hispanic students. Specifically, the rate among Caucasian students has declined from 40% in 2014-15 to 34% in 2017-18, and the rate among Hispanic students has increased from 7% in 2014-15 to 41% in 2018-19. This change is consistent with the broader shifts in ethnicity observed across the student population.

Standards for the licensure examination pass rates and the job placement rates were set by the program faculty. The licensure examination pass rates institution set standard for Respiratory, EMS, and Paramedic were all set at 70%. The institution set standard for Radiologic Technology was set at 78.6%. Some of the rates were based on the standard deviation described previously and others based on expectations from individual accrediting agencies from each program. All of the programs have exceeded the institution set standards consistently for both the licensure examination pass rates and the job placement rates.
