

### Institution-Set Standards

The institution-set standards are reviewed annually by the Institutional Effectiveness, Accreditation, and Outcomes Committee and were developed at Crafton Hills College in 2013. In setting the standards, Crafton worked from the ACCJC guidance that the college should not fall below the number or rate that was set. If the college did fall below this number, then it would focus more energy and resources than normal to increase the College rate. At the time, the College adopted the common approach of calculating a five-year average and using one standard deviation below the average to identify a minimum. This approach was used, because the College felt that a decrease of one standard deviation represented a substantial decrease. There is an important distinction between the institution-set standards and the College's stretch goals. The Educational Master Plan Committee annually reviews the College's stretch goals, which are separate from the institution-set standards.

The College has identified the following institution-set standards: 63.6% for successful course completion, 204 certificate completions annually, ~~250~~428 degree completions annually, and ~~338~~463 transfers annually.

Data Element	Definition	Institution-Set Standard	2019-2020 Outcome
Course Completion (Success) Rate	The number of students earning a "C" grade or better divided by the number of grades at census multiplied by 100 in the fall semester. Represented as a percent of students successfully completing a course.	63.6%	76.7%
Certificates	The annual number of students earning certificates which are awarded with 16 or more units.	204	497
Degrees	The annual number of students earning AA/AS degrees. This excludes transfer degrees.	<del>250</del> 428	475
Transfer	The annual number of transfers to four-year universities. Includes CSUs, UCs, Private, and Out-of-State universities.	<del>463</del> 338	497

### Successful Course Completion

Crafton Hills College has an institution-set standard of 63.6% for the successful course completion rate. The stretch goal is 73%. In the five years the annual successful course completion rate has ranged from 72.5% to 76.7%. While the 2019-2020 success (76.7%) exceeded the stretch goal, this may serve as an outlier that stems from institutional changes associated with the shift to remote instruction. Additional data for 2020-2021 (and 2021-2022) are likely needed to assess the consistency of this pattern before making a significant change to our set standard or stretch goal.

Course success rates have remained relatively consistent and well above the institutional set standard across all ethnic groups, except with respect to African American students. While African American students achieved a 70% success rate in 2019-2020, the college remains very much focused on enhancing efforts towards identifying the potential reasons underlying this achievement gap and responding to these findings.

Success rates have also remained largely consistent across age groups, except that significant increases were observed for all age groups in 2019-2020. And in all cases, such rates have remained well above the institutional set standard. Consistent with past findings, older students generally achieved higher course success rates than younger students.

Success rates have also remained consistent for male and female students, all of which achieved success rates well above the institutional set standard. In fact, the success rates across both gender groups remained similar across the five-year period between 2015-16 and 2019-20. The course success rates of students for whom no gender is recorded has varied from year-to-year, largely due to the small numbers of students per year (ranging from zero to eight).

## Certificates

Crafton Hills College has an institution-set standard of 204 certificates earned annually. The stretch goal is ~~296~~ ~~255~~. The institution-set standard and the stretch goal are based on the annual number of 16 or more unit certificates earned prior to 2019-2020. The number of certificates earned in 2019-2020 (497) is far higher than the number observed in any other year, and as such, is not being taken into account in determining either the set standard or the stretch goal. Thus, while the number of certificates for 2019-2020 far exceeds the stretch goal of 296, we will wait to examine 2020-2021 data before incorporating what appears to be outlier into the process of estimating the set standard and stretch goal.

The certificates earned by student ethnic groups have largely mirrored groups' corresponding representation across the entire campus. One pattern that perhaps best reflects this idea is the declining percentage of certificates earned by Caucasian students (47% in 2015-16 and 38% in 2019-20) and the increasing percentage of certificates earned by Hispanic students (41% in 2015-16 and 46% in 2019-20), both of which are consistent with the broader changes in the corresponding student populations.

The certificates earned by student age group indicate that, on average, students earning a certificate were between the ages of 20 and 29 years of age, consistent with broader student population. However, the percentage of students between 20 and 24 earning a certificate has increased over time (increasing from 37% in 2015-16 to 57% in 2019-20), and the percentage of students between the ages of 25 and 29 years of age earning a certificate has decreased (from 38% in 2015-16 to 22% in 2019-20).

## Degrees

Crafton Hills College has an institution-set standard of ~~428~~ 250 AA/AS degrees earned annually. The stretch goal is ~~492~~ 450. The institution-set standard and the stretch goal are based on the annual number of AA/AS degrees earned. In the last five years the number of annual degrees earned has ranged from 427 to 476 degrees, indicating great consistency from year-to-year.

As is the case with certificate attainment, the AA/AS degrees earned by student ethnic groups have largely mirrored groups' corresponding representation across the entire campus. The pattern that perhaps best reflects this idea is the declining percentage of degrees earned by Caucasian students (44% in 2015-16 and 39% in 2019-20) and the increasing percentage of degrees earned by Hispanic students (41% in 2015-16 and 43% in 2019-20), both of which are consistent with the broader changes in the corresponding student populations.

The transfers to CSU campuses have remained relatively consistent across student ethnic group, except with respect to Caucasian and Hispanic students. Specifically, the rate among Caucasian students has declined from 40% in 2015-16 to 35% in 2019-20, and the rate among Hispanic students has increased from 36% in 2015-16 to 47% in 2019-20. This change is consistent with the broader shifts in ethnicity observed across the student population.
