Dear Enrolling Families,

I want to welcome you to the Child Development Center and Lab school at Crafton Hills College (CHC CDC). This past year + has been a time like we have not ever experienced. I want to assure you that we, at CHC CDC, consider your child’s health and safety our top priority. We closed our center mid-March 2020 when our county’s health department issued the recommendation to do so. During our closure, the center was deep cleaned and disinfected.

As we prepare to re-open, we are following all Centers for Disease Control (not to be confused with our CDC, Child Development Center!), Department of Health, and Community Care Licensing guidelines for childcare centers; most of which are already embedded in our health practices, such as frequent handwashing, cleaning and sanitizing often touched items and hard surfaces, covering coughs, and health checks with exclusions for fever, rash, and other communicable type diseases. We may be implementing additional steps as indicated when school begins August 9, 2021.

When we return, we will focus on the children’s social and emotional development. We understand, for many of you and your child, this past year has been spent away from direct connections with others. Our staff will do their best to ensure a welcoming transition into school.

You will be provided with updated information as we get closer to our start date. Again, thank you for trusting us to be your child’s early education program.

Deborah Wasbotten, Director CHC CDC
