Purpose of Brief:

The Health and Wellness Center (HWC) deployed a short online survey amongst Crafton Hills College (CHC) faculty to help improve their center services. A total of 48 faculty members of the college were surveyed and responded to multiple-choice questions about the center's services that occurred during 2011-12.

Summary of Findings:

- 100% of respondents *Strongly Agreed* or *Agreed* that students who are physically and emotionally healthy are better able to pursue their academic goals
- 81% of respondents *Strongly Agreed* or *Agreed* that the quality of health education and services in the HWC is a good value to CHC students
- 71% of the respondents *Strongly Agreed* or *Agreed* that they inform students about the health services in the Health and Wellness Center
- 65% of the respondents *Strongly Agreed* or *Agreed* they announce health education events and new programs to students when they are informed by HWC staff or others
- 42% of the respondents indicated that they referred 7 or more students to the HWC last year

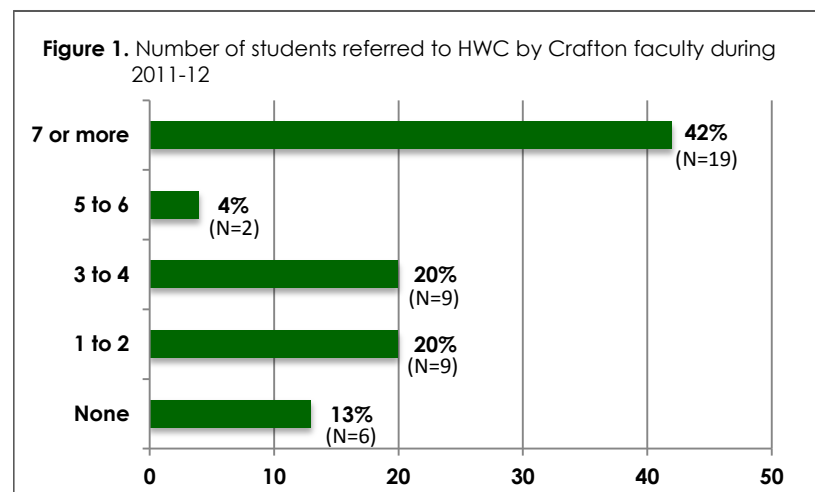

Methodology

The survey responses were collected between January and May 2013. The faculty were prompted about the health services and announcements on health education and events they inform students about, whether they agreed that students who are physically and emotionally healthy are better able to pursue their educational goals, and if they agreed that the quality of health education and services at the center is valuable to students. Respondents were also asked to rate their level of agreement with four statements about the HWC on a Likert five-point scale, 5=Strongly Agree; 4=Agree; 3=Neutral; 2=Disagree; 1=Strongly Disagree (see Table 1). Respondents also indicated the number of students they referred to the center last year (see Figure 1).

Table 1. Respondents answers to statements about health education and services at the HWC

Statement	Strongly Agree		Agree		Neutral		Disagree		Strongly Disagree		Total
	#	%	#	%	#	%	#	%	#	%	
I inform my students about the health services in the Health and Wellness Center	24	50	10	21	7	14	4	8	3	6	48
I announce health education events and new programs to my students when I am informed by HWC staff or others	18	38	13	27	11	23	3	6	3	6	48
Students who are physically and emotionally healthy are better able to pursue their academic goals	44	92	4	8	0		0		0		48
The quality of health education and services in the HWC is a good value to CHC students	32	68	6	13	8	17	0		1	2	47

Note: The total number on this table varies because some respondents did not answer every question.

Note: Some respondents did not state the number of students they referred.
