

Evaluating Sources

Presentation By: Jordan Montejano

English Instructor

Crafton Hills College

Where to Find Sources

The first part of evaluating sources involves knowing where to look.

Types of Sources

There are various types of sources to consider for your essay.

Credibility

A source is only as useful as it is credible.

How to Read a Source

Identify the sections of a source, so you will read more efficiently.

Where to Find a Source

Library Sources

<https://www.craftonhills.edu/current-students/library/index.php>

Go to the home page on craftonhills.edu and click the library option under the student services tab.

If you are looking mostly for physical texts, you can type into the Search Catalog box to search for books in the library. After you pick search, you can choose which libraries, Crafton Hills, SB Valley, or libraries worldwide, you want to include.

Research Guides offer suggestions and tips for finding sources for specific subjects.

Article Databases

[craftonhills.edu>student services>library>Article Databases](https://www.craftonhills.edu/student-services/library/Article-Databases)

<https://www.craftonhills.edu/current-students/library/library-databases/index.php>

EBSCO is a useful resource for most subjects and you can find a variety of scholarly and non-scholarly sources.

US Major Newspapers has access to five major newspaper sources.

Opposing Viewpoints in Context features sources on various current and controversial topics.

Films on Demand has thousands of educational videos.

Depending on your class, **Google Scholar** may be a good choice for research as well.

Library Databases

[Home](#) » [Library](#) » [Library Databases](#)

For assistance with databases or to obtain login information for off-campus access, please contact us at **909-389-3321** or **909-389-3378**.

Great places to start your research

EBSCO Academic Search Complete This is a great place to start for research papers, projects, essays, etc. This database provides access to 1,000s of journals in all subject areas—English, History, Math, Science, Art, Philosophy, Psychology and much more. [EBSCO Databases](#) Search all EBSCO resources at once.

Credo Reference This is a great database to get background information on your research topic. Credo provides access to reliable information from encyclopedias, dictionaries, biographies, bilingual dictionaries and more.

Films On Demand A comprehensive collection of over 6,000 educational videos covering a wide range of topics organized appropriate for academic research.

US Major Newspapers Provides access to the five most respected newspapers in the U.S. including the New York Times, Los Angeles Times, Washington Post, Wall Street Journal, and the Chicago Tribune.

Biography Reference Center this database offers a comprehensive collection of 450,000+ full-text biographies, as well as thousands of unique narrative biographies

I can't find my source

Notes:

A Note on finding Sources

There are various types of sources, so depending on your subject and purpose, there are different types of sources to consider.

If your professor assigns you a research paper with a requirement of four scholarly sources and four non-scholarly sources for a total of eight sources, then you will need to know what to look for.

The next section will distinguish between different types of sources as well as the difference between scholarly and non-scholarly sources.

A recording of a speech is a primary source since the speaker is the originator of the source.

Primary and Secondary Sources

Primary Sources

Something from the person who experienced it first-hand like a reporter on the scene. This could be something like a diary, document, artifact, or direct knowledge.

Secondary Sources

A book, object, article or text that is on a subject, but is not the original source of information. A secondary source may refer to primary sources and discuss them.

Scholarly/
Non-Scholarly

A textbook on grammar is a secondary source because it discusses things that are already agreed upon. It may reference primary sources, but it is not creating new information.

Notes:

Scholarly/Non-Scholarly Sources

Commonly, your professor will expect you to have a variety of scholarly and non-scholarly sources.

Scholarly Sources

Articles, books, and similar works that are written and peer reviewed by experts in the field. In college, most scholarly sources that professors want are peer reviewed articles.

Non-Scholarly Sources

Anything that isn't peer reviewed like a blog, website, television show, YouTube video, or work of fiction.

Scholarly Article from Gale: Opposing Viewpoints in Context

Adolescent cellphone use while driving: an overview of the literature and promising future directions for prevention

Authors: M. Kit Delgado, Kathryn J. Wanner and Catherine McDonald
Date: June 2016

From: Media and Communication (Vol. 4, Issue 3)
Publisher: Cogitato Press

Document Type: Abstract
Length: 8,490 words
Content Level: 855 (Level 5)
Lexile Measure: 1550L
DOI: <http://dx.doi.org/10.17645/mac.v4i3.536>

Abstract:

Motor vehicle crashes are the leading cause of death in adolescents, and drivers aged 16-19 are the most likely to die in distracted driving crashes. This paper provides an overview of the literature on adolescent cellphone use while driving, focusing on the crash risk, incidence, risk factors for engagement, and the effectiveness of current mitigation strategies. We conclude by discussing promising future approaches to prevent crashes related to cellphone use in adolescents. Handheld manipulation of the phone while driving has been shown to have a 3 to 4-fold increased risk of a near crash or crash, and eye glance duration greater than 2 seconds increases crash risk exponentially. Nearly half of U.S. high school students admit to *texting while driving* in the last month, but the frequency of use according to vehicle speed and high-risk situations remains unknown. Several risk factors are associated with cell phone use while driving including: parental cellphone use while driving, social norms for quick responses to text messages, and higher levels of temporal discounting. Given the limited effectiveness of current mitigation strategies such as educational campaigns and legal bans, a multi-pronged behavioral and technological approach addressing the above risk factors will be necessary to reduce this dangerous behavior in adolescents.

Keywords:
accidents prevention, adolescent, cell phones, distracted driving, text messaging

Reading an article

Articles can be quite long, so feel free to read the abstract, introduction, and conclusion first, so you will know if the article is useful for your essay.

Abstract

Read the abstract first. This will give you an idea of what the article is about.

Introduction

Read the introduction to find the argument or hypothesis being presented.

Conclusion

Read this section to find out about the results or findings of the experiment.

Keeping Track

As you collect sources to use in your essay, be sure to summarize them, make notes, and find relevant quotes to use.

Citing an Article

You can either directly quote your source or paraphrase it. (For citation tips see our handouts or our Research, Essay Writing, MLA, or APA Workshops).

Notes:

Biased/Unbiased

Biased
Stay away from Biased sources that don't use clear facts or rely heavily on emotion. They sometimes only show one side of an issue.

Unbiased
Unbiased sources present their findings with facts and figures. They don't rely purely on emotion and are logical.

Logical Fallacies

Ethos, Pathos, and Logos

Authority

Works Cited

Fallacies

You may find a source that seems reliable, but is guilty of a logical fallacy, a mistake in reasoning. Make note of these fallacies and try to avoid them both in your paper and in your source material.

Fun Logical Fallacy Examples:

- Basketball players are tall, so all tall people are basketball players. -False Cause
- If we install a self-checkout in our grocery store, then the machines will take over. -Slippery Slope
- If you are not a Democrat, then you are a Republican. -Black-or-White
- You're argument can't be considered because you aren't even wearing matching socks. -Ad Hominem

strawman

Misrepresenting or exaggerating someone's argument to make it easier to attack.

false cause

Presuming that a real or perceived relationship between things means that one is the cause of the other.

slippery slope

Asserting that if we allow A to happen, then Z will consequently happen too, therefore A should not happen.

ad hominem

Attacking your opponent's character or personal traits instead of engaging with their argument.

special pleading

Moving the goalposts or making up exceptions when a claim is shown to be false.

loaded question

Asking a question that has an assumption built into it so that it can't be answered without appearing guilty.

the gambler's fallacy

Believing that 'runs' occur to statistically independent phenomena such as roulette wheel spins.

bandwagon

Appealing to popularity or the fact that many people do something as an attempted form of validation.

black-or-white

Where two alternative states are presented as the only possibilities, when in fact more possibilities exist.

begging the question

A circular argument in which the conclusion is included in the premise.

Notes:

Ethos, Pathos, and Logos

You may understand a source better if you understand how they base their argument.

Ethos

- Appeal to ethics
- Persuade the reader by building credibility and trust.

Pathos

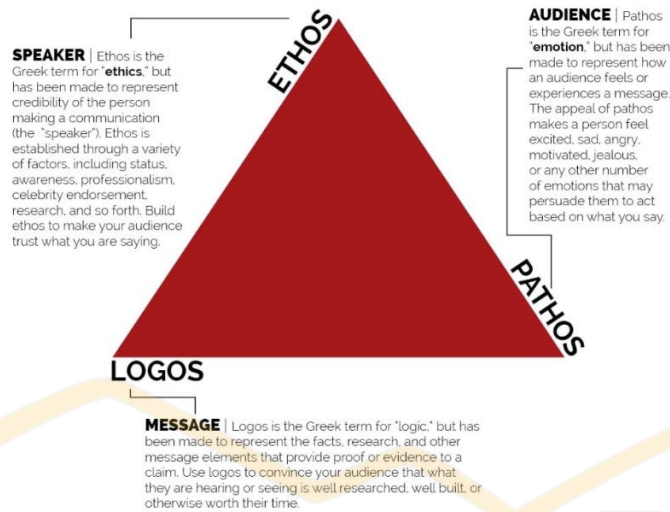

- Appeals to emotion
- Persuade the reader through strong emotion.

Logos

- Appeals to Logic
- Persuade the reader through evidence and research.

THE RHETORICAL TRIANGLE

AN OVERVIEW OF THE THREE RHETORICAL APPEALS

TheVisualCommunicationGuy.com

Beware of sources that appear to have a reasonable argument but lack enough support on both sides of the issue.

An argument may only appear strong because they purposely make the opposition weak or avoid it entirely.

Authority

Another important factor in choosing sources is authority, or whether or not what is being expressed is backed by professional knowledge and reliability.

A source may not be a traditional scholarly source but may still present the truth from a trusted person of authority such as an expert in the field.

An example of this would be a newspaper article that presents evidence from trusted doctors or scientists, even though the article itself is written by a journalist who is not an expert on the topic.

Check and see if the person/source that claims to be an authority is trustworthy before selecting it as a source.
